KUKUNOORI SAI LAXMAN

FULL-STACK DEVELOPER

Bhadrachalam | sailaxmankukunoori@gmail.com | Portfolio | Github

SUMMARY

UPassionate and self-driven 2024 Computer Science graduate with hands-on experience in both front-end and back-end development. Proficient in building responsive web applications using HTML, CSS, JavaScript, React, Node.js, Express.js, MySQL, and PostgreSQL. Seeking a challenging full stack development role to contribute to innovative tech solutions.

TECHNICAL SKILLS

- HTML5, CSS3
- JavaScript (ES6+)
- React.js
- Node.js
- Express.js
- MySQL, PostgreSQL
- Git & GitHub
- RESTful APIs

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern   **December 2024 - Present**
Nuexa Global, Remote/On-site

- Contributed to the development of the official Nuexa Global website, focusing on responsive UI, backend APIs, and user experience optimization.
- Collaborated with cross-functional teams to build Tastezy Marketplace, a scalable e-commerce platform supporting product listing, cart management, and secure checkout.
- Utilized technologies such as React.js, Node.js, Express.js, MySQL to implement full-stack features.
- Gained hands-on experience with version control (Git/GitHub), RESTful APIs, and agile development practices.
- Actively participated in code reviews, debugging, and deployment processes for live projects.

EDUCATION

B.Tech in Computer Science and Engineering   **Dec 2020 - July 2024**

Sai Spurthi Institute of Technology, Khammam(dist)

- Graduated : 2024
- CGPA : 8.24

PROJECTS

JWT Authentication System

- **Tech Stack:** React.js, Node.js, Express.js, MySQL, JSON Web Token (JWT).
- Built a secure authentication system that enables users to register, log in, and access protected resources using JWT-based authentication. Implemented role-based access control, hashed password storage, and token validation mechanisms to ensure API-level security.

What I Learned:

- Fundamentals of authentication and authorization
- How to protect frontend routes using React Router + JWT
- How to build secure REST APIs with middleware in Express
- Hands-on experience with MySQL joins, table indexing, and query optimization.

Mini E-Commerce Website

- **Tech Stack:** React.js, Node.js, Express.js, MySQL, JSON Web Token (JWT).
- Built a full-stack mini e-commerce website that allows users to browse products, add them to the cart, and make purchases. Integrated authentication and order management features, ensuring a smooth user experience from product selection to checkout.

What I Learned:

- Full-stack development: React.js for frontend, Node.js/Express.js for backend, and MySQL for the database
- Handling authentication and session management with JWT
- Implementing shopping cart logic and order processing
- REST API design for product and order management
